

Customer Portal

Members and Customers now have online access to their water usage information via the S.S. Water Supply web site.

As part of our ongoing efforts to improve services to our Members and Customers, S.S. Water Supply has upgraded our water system with “smart” meters, and we now offer a portal to help you monitor your water usage, offering you direct and secure access to your water usage data.

The S.S. Water Supply web site now offers online portal and smartphone apps to review and analyze your water usage patterns. With these tools, you are now able to view your usage activity and gain greater understanding and control of the amount of water you use. You are also able to establish alerts, including identifying potential leaks and abnormal increases in your water usage.

To access your smart meter data and notifications, please log into your account on the S.S. Water Supply Corp payment system. The payment system is located here: <https://portal.sswater.net>
